BIOLOGY, B.S.

The B.S. in biology offers preparation for graduate school and a sound basis for professional training in the biological and health sciences. Biology is an unusually broad field, and students can tailor their programs to fit their own needs and interests. To provide flexibility in pursuing personal interests or career preparation, the student chooses 18 credits of upper division biology electives. The Department of Biology encourages students to develop as active scholars and to participate in undergraduate research.

[^]First math course is determined by ACT math score. This schedule presupposes placement into Calculus I - MATH 1290, 1296, or 1596.

¹CHEM 1161/1162 Honors General Chemistry I and II may substitute for CHEM 1151/1152

²MATH 1296 Calculus I or MATH 1596 Honors Calculus I may be substituted for MATH 1290.

³STAT 2411 or STAT 3611 or MATH 1297 Calculus II may be used for additional math requirement

⁴Students must complete 18 credits of biology electives 2XXX level or higher. Electives must include at least two lab courses or two courses with lab components. At least one course must be chosen from BIOL 3601, BIOL 3701, or BIOL 4501. BIOL 3993 may be applied to the major for a maximum of 2 cr. SSP 3002 for Supplemental Instruction (SI) in Biology may be substituted for BIOL 3993 only by prior departmental approval.

Max of two of the following may be used: MDBC 5501, MICB 5545, MICB 5555, PHSL 5601, PHSL 5602, PHSL 5701.

⁵Take either BIOL 2802 Ecology Laboratory, BIOL 2102 Cell Biology Laboratory or BIOL 2202 Genetics Laboratory for Laboratory Course requirement

⁶PHYS 1001/1002 may be replaced by PHYS 2011/2012 that requires the completion of MATH 1297 Calculus II.

NOTE: In addition to the above requirements, students must complete the liberal education program and a minor (or a second major) to earn a B.S. degree. The Cell and Molecular Biology major may not be used to satisfy this requirement.
