Criteria and process for listing:

- Only refereed (i.e., peer reviewed) publications will be accepted for numbering. No abstracts or gray literature please.
- Paper titles should be sent to the IDEAL Program Office AFTER they have been accepted by the publisher for publication.
- The IDEAL Program Office will respond promptly with a number that can be added to the acknowledgements section of the paper.
- All papers with a number in the IDEAL series should be cited in the paper's acknowledgements as follows: "This is publication #___ of the International Decade of East African Lakes (IDEAL) Program."
- Authors are expected to provide the IDEAL Program Office with a complete citation as soon as they have this information to allow the bibliography to remain up-to-date and complete (esp. page numbers which generally won't be known at the time of the request for # assignment).
