

# Storm Drain Marking

Photo courtesy of the City of Duluth

Many people don't realize that storm sewer catch basins drain directly into our rivers and lakes without being treated. The UMD storm water program is starting a storm drain marking requirement for projects installing curbs and gutters.

The contractor installing the new curb and gutter will be able to borrow an imprint stencil from: Facilities Management  
241 Darland Administration Building  
1049 University Drive  
(218) 726-8262

By imprinting the stencil into the wet concrete we eliminate the maintenance concerns associated with painted stenciling.
