

Mike Nemitz

Mike Nemitz is a senior exploration geologist with Newmont Mining Corporation. He graduated from the University of Minnesota, Duluth with a B.Sc. (2001) and followed this up with a M.Sc. from the University of Idaho (2003). He is currently managing Newmont's exploration activities in New Zealand. In previous roles Mike managed exploration projects in Alaska, Yukon, and Nevada with lesser roles associated with projects in Wyoming, California, and Mexico. These projects have included Carlin-type, intrusion related, orogenic, low-sulfidation epithermal, and alkalic gold systems. Mike began his career working as a mine geologist at Newmont's open pit operations on the Carlin Trend in Nevada.
