Diesel is a 5-year old fawn Great Dane. He’s a bit on the small side for a Dane, but he’s been DNA tested and the results confirmed that he is a purebred. Diesel was surrendered to Animal Allies Humane Society in 2012. The previous owners had another Great Dane that was attacking him, so they decided they couldn’t keep him. He has scars on one of his front legs and a couple on his head. Despite being attacked, it like other dogs and is very friendly. Diesel serves as an ambassador for Animal Allies at many of their events. He helps out at many Animal Allies fundraising events (and he’s very good at raising money for the shelter!) and he’s represented Animal Allies in the Christmas City of the North Parade. He has a BIG appetite - six cups of dog food a day plus a couple of treats; sometimes that includes people food when he manages to find something we’ve left on the counter or even in the lowest shelf in a kitchen cupboard. Diesel is also a BIG lap dog - he would rather sit on your lap than on the floor. He’s also a drooler, but we love him anyway.
