This print takes us to Mount Fugi, a volcanic mountain in Japan. This artist created 36 images of Mount Fuji from many different viewpoints and at different times of the year. The artist was a guest with the Shogun and his court and he made these sketches which became prints and made him world famous.
Make your own drawing and print of an outdoor scene or popular landmark. Design an asymmetrical composition of an outdoor scene below and then create a print by taking a styrofoam plate and cutting the edges so that it is flat. With a dull pencil, draw your landscape onto the plate. See how many ways you can use lines. Cover the plate with paint and press your plate onto the paper to make a print.
