Remember to travel light and be prepared. Everything has to fit into a pack. Keep in mind that the weather can vary from very hot and sunny to cold, rainy and windy. This list is designed to help you choose what to bring. Please bring everything on the list except optional items. This will help you to be comfortable and safe on your trip.

Plan your clothes so they can be worn over each other in layers so that in the coldest of weather you can wear nearly all your clothes. We recommend wool because it stays warm when wet. Capilene, thermax, synchilla, polypropylene and other synthetic fabrics that have thermal and wicking properties can be substituted for wool. Please consult your trip leaders if you have any questions. Dress for function, not fashion!

WE FURNISH:
