Location

Descrizione A sound artist all his life, Leif Brush uses various technologies to amplify the inaudible sounds in physical nature, particularly the tree. Via satellite, in auditoria, fro overhead speakers in trees he reconstructs contextual, spatial sound, and focuses on the sonification process os computer imaging from these sounds.

File Audio:

Note Cfr. nn. Arch. 184.9 ZERO is a limited edition collection of one-minute soundworks by international sound artists, experimental composers, noise makers and other audio creators. Contributors were invited to create an original recording of one-minute duration for the CD on the theme of ZERO - whether through their stripped-down, low-tech aesthetic or a focus on themes of absence, abstraction, distortion or a sense of threshold between one state and another. The CD contains a broad variety of one-minute soundworks and presents the results of artists working thematically in chance juxtaposition. By bringing together this calibre and range of contributions, ZETRO aims to stimulate further interest in the artist work and practice, debate and dialogue surrounding sound art. The artists on ZERO range from well known world figures, to individuals and groups making their first wirks in this field. ZERO was commissioned by the Foundation for Art & Creative Technology (FACT) and was published with the support from Liverpool Art School.

Contenuti "My participatory work focuses on an aural approach to a second look at nature. I listen to potentials from terrestrial sferics and ground-truth as earth's sonics remain my focused research via the Windribbon. Windscuve and Meadow Piano concepts, extratrrrestrial spatial constructs, ans especially information from the Mars Microphones".
