Group members (2 to 4): $\qquad$
(1) Find the center of mass of a hemispherical shell with outer radius $R_{2}$ and inner radius $R_{1}$, centered at the origin (i.e. this shell is defined by $z \geq 0, x^{2}+y^{2}+z^{2} \leq$ $R_{2}^{2}$, and $x^{2}+y^{2}+z^{2} \geq R_{1}^{2}$ ).
(2) What are the $z$-coordinates of the center of mass for the extreme cases where (A) $R_{1}=0$, and (B) the limit as $R_{1} \rightarrow R_{2}$ ?
