Advanced Warning Sign Project: Eagle Lake/W. Tischer Rd Intersection

* D1, D2, D3: Vehicle Detectors, S1, S2, S3, S4: Advanced Warning Signs
* When detector D1 detects a vehicle, signs S1 and S2 LEDs blink for 8 seconds.
* When one of the detectors D2 or D3 detects a vehicle, signs S3 and S4 LEDs blink for 10 seconds after vehicle departs from sensor.
* All communications between detectors and signs are wireless.

Developed by University of Minnesota Duluth and St. Louis County
