Reporting and Record Keeping

The general permit requires an annual report by March 10 of each year. The report must include:

1) Status of compliance with the permit conditions, including an assessment of appropriateness of BMPs, and progress toward achieving the stated goals.

2) Storm water activities planned to be undertaken in the next year.

3) Any change in the identified BMPs or measurable goals for any of the minimum control measures.

3) Notice of other entities used to satisfy some of our permit obligations, if applicable.

The Storm Water Steering Committee will oversee the completion of the annual report. UMD Facilities Management will keep the master records of the program for a minimum of three years after the termination of the permit, unless otherwise requested by the Commissioner of the MPCA.
