This table illustrates that of the 90 people who are at least somewhat interested in the concept of online dating, 40 people are somewhat interested in the new online dating service being offered, which accounts for 44% of the 90 people that have been selected; which is equivalent with the valid percentage (meaning everyone who was eligible to answer, did answer), and cumulatively 77.8 percent of the 90 people are at most somewhat interested in the new online dating service being offered.
This table illustrates that of the 90 people that are at least somewhat interested in the concept of online dating, 30 people thought that $10 was an appropriate monthly fee for online dating, which accounts for 33.3% that were selected; accounting for 50% of the people who were selected and who answered the question; and cumulatively resulting in 100% of everyone who answered the question believes that an appropriate monthly fee for online dating should be no more than $10.
