As mentioned in class, in a nutshell, **the exam** will consist of four questions drawn at random by  canvas from a pool of questions generated from the questions you have submitted to the discussion assignment, plus a few more that I added (also included in with the questions from the discussion). Use the annotated questions from the assignment as **study questions**, after they have been reviewed and annotated. You can find that in the “Discussion” and “Assignments” sections of your  canvas folder. **They are also here:**
