one item you will see often (and often repeated) is that American Anthropology traditionally has a four-fold approach to the study of humans and closely related species

these four fields include ...

American Anthropology

cultural / social

- physical
- archaeology
- linguistics

so why study Prehistoric Cultures?

it's an excellent place to find out about many fascinating aspects relating to humans . . . and you already know a lot about those sorts of things . . .

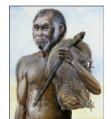

just have a look at the little pictures on the course materials, for e.g., . . .

and to study Prehistoric Cultures in this tradition there are a few basic characteristics of anthropology to keep in mind . . .

Main Characteristics

- 1. the *four fields* of general anthropology
- 2. *culture* as a primary *concept*
- 3. *comparative method* as major *approach* to the study of human behavior
- 4. *holism* or the study of "humankind" as a whole, as a *primary theoretical goal*
- 5. fieldwork as a primary research technique, involving *"participant observation"*
