

VP EMPRINT SPOT DOT

The VP SpotDot is the world's only Braille and color inkjet printer producing braille and color ink on the same page.

- Prints Braille at 50 CPS
- Uses the same ink cartridges as an HP inkjet printer to print with any color
- Easy to use control panel with tactile keys
- Black or colored text accompanying the Braille text.
- Variable dot height used to represent differences in color (Haptic Color)

VP PREMIER & VP ELITE EMOSSERS

In a production setting where speed and performance are essential, the VP Premier and VP Elite embossers produce high quality double-sided braille and unsurpassed tactile graphics. Fast and durable, these embossers deliver non-stop performance year after year.

- Variable dot heights for color or greyscale representation in graphics
- Black ink Options
- High speed embossing with Tiger high-resolution graphics
- Automatic two-sided embossing; no turning of paper required
- Enduring hardware for hours of production
- Speeds of 100 – 200 CPS

The latest version of our Tiger Software Suite is included when purchasing a ViewPlus embosser. TSS gives you the ability to create documents in standard Windows programs such as MS Word or Excel. By pressing a button you get Braille, tactile graphics, and ink in a single pass.

Below is a side by side comparison of the models:
